

RoEduNet have setup a VC 'room' for Terena GA32 meeting. No explicit advance booking is required.

- MCU GDS Number: 004910097920483
- Public gatekeeper - pgk.vc.dfn.de

Dial-in methods without GDS:

- Dial-in via H.323 Annex O (URL dialing):

You need no gatekeeper registration and can dial into the conference room using a URL syntax. This is a little bit tricky because it depends on the system brand:

For Tandberg and Mirial Systems use: 004910097920483@mcu.vc.dfn.de

For Polycom and Lifesize Systems use: mcu.vc.dfn.de## 004910097920483

VCON doesn't support URL dialing.

- Dial-in via SIP:

If you want to dial into vial sip you can use:

004910097920483@mcu.vc.dfn.de

But note that there will not be H.230 functionality.

If you need h.323 software programs for you OS we recommend :

- * Windows XP,2000 and older versions: Microsoft Netmeeting: www.microsoft.com
- * MAC OSX Xmeeting URL: <http://xmeeting.sourceforge.net/pages/downloads.php>

For SIP software programs we recommend X-LITE for both Windows and MAC OSX/LINUX:

- * X-lite URL : <http://www.counterpath.com/>

Conference schedule :

22/10/2009 from 13:00 to 18:00

23/10/2009 from 09:00 to 13:00 (all CET)
