

# The quest for End-to-End network performance ...

- › My personal assumption: no white knight (and no silver bullet), but an army of people working very hard
- › End-to-End approach
  - › What *problem* are we trying to solve ?
    - › Technical: end node config tuning, fault troubleshooting, etc.
    - › Sociological: trust ...
  - › What does a Grid app need to know ?
  - › What does Grid middleware need to know ?
  - › What does the network need to know ?
- › Active measurements – when worth running ?
- › Need for coordinated actions ?
