

Welcome to TF-CSIRT 19

Viestintävirasto
Kommunikationsverket
Finnish Communications
Regulatory Authority

Rauni Hagman
Director-General
Finnish Communications Regulatory Authority

FICORA as a national network and information security authority

- Specific duty of the Authority is to safeguard the functionality and efficiency of the communications markets
- FICORA issues technical regulations, recommendations and guidelines concerning a sufficient level of information security measures
- Functions related to Information Security and Internet are brought together in one department

Internet and Information Security

Enabling the development of communications

Vision:

A secure society with a functional and secure networks environment that enables the supply of high quality communications services.

3

7

TF-CSIRT

- The TERENA TF-CSIRT task force meetings are one of the most active CSIRT/CERT community information exchange and project coordination forums in Europe
 - Activities like
 - Trusted Introducer service
 - supporting development of information exchange data formats IODEF and VEDEF
 - IRT object for RIPE database
- are examples of continuous development activity within the TF-CSIRT framework
