20. May 2010, Heraklion

**EGEE → EGI**

**EGEE → EGI**

**OSCT → EGI-CSIRT**

# Refresher EGI

## **EGI = European Grid initiative**

See also Daniel Kouril talk at the last TF-CSIRT

- Foundation under Dutch law EGI.eu:
  - ... create and maintain a pan-European grid infrastructure in collaboration with NGIs in order to guarantee its long-term availability ...*
- One member per country: National Grid Initiatives (NGI)

**Make EGEE result last!**

# Structure of EGI

## Vision: Federation of NGIs

- EGI is the umbrella organisation of the
- EGI Coordinates and operates international activities
- One NGI / Country
- Four years funding from the EU (EGI-InSPIRE)
- Future: Supported by NGI's

Integrated Sustainable Pan-European Infrastructure for Research in Europe

▶ **EGI stays after the 4 years**

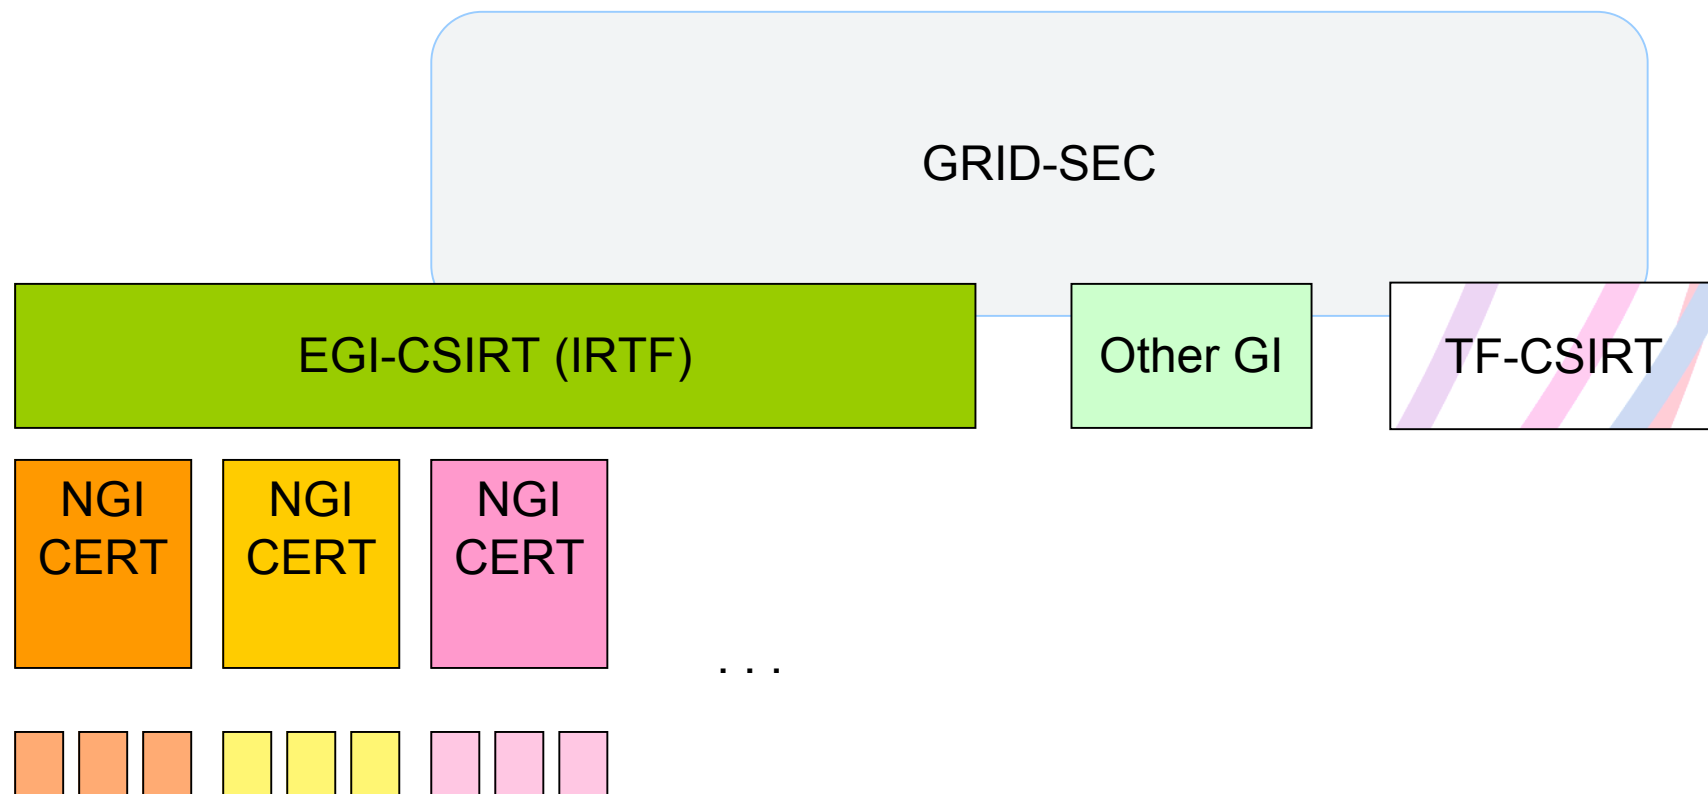

# Difference to EGEE

EGI aims at making the grid sustainable

- ➔ Shift responsibilities to members
- ➔ Follow a bottom up strategy

EGEE was much more top down, centralized

# Security

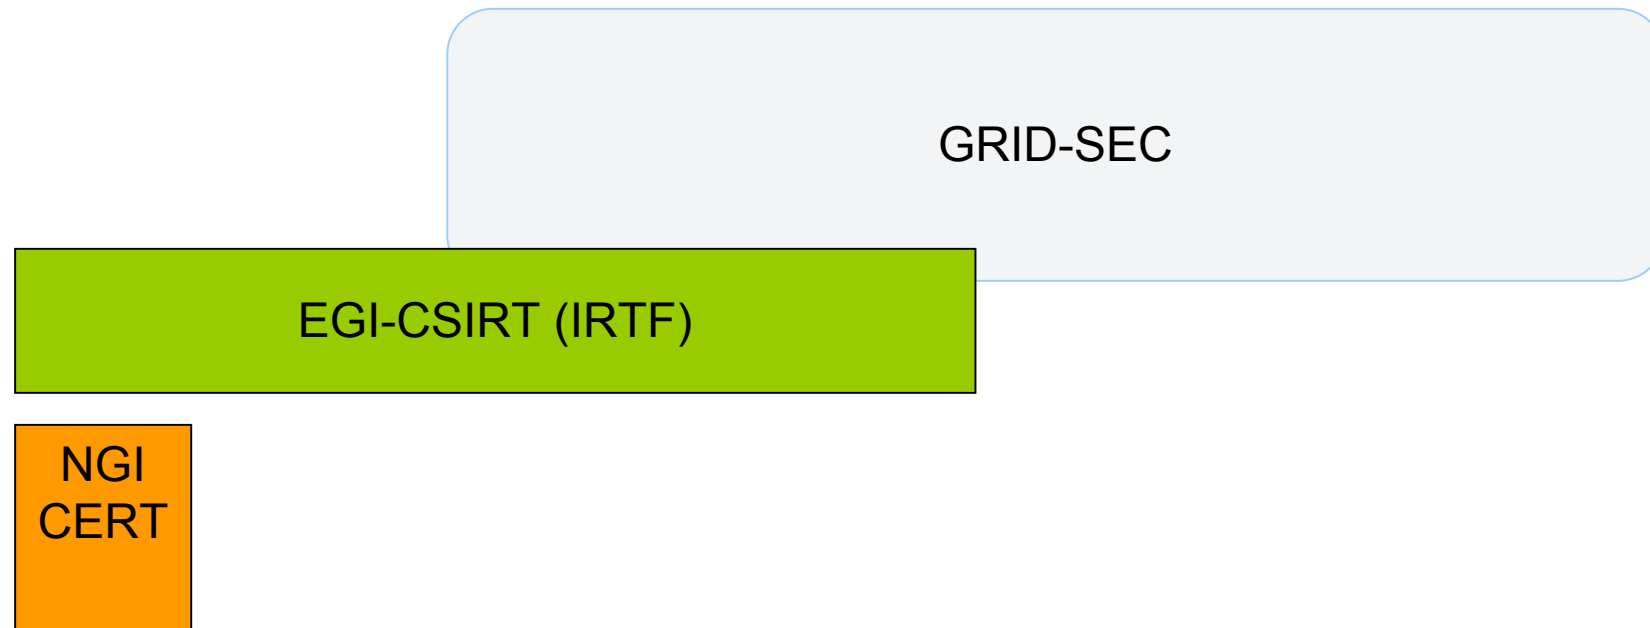

# Incident Response

- All the dirty stuff happens here (Forensics, etc )
- Must inform [project-egee-security-csirts@in2p3.fr](mailto:project-egee-security-csirts@in2p3.fr)
- Details: “OSCT Incident Responce Procedure” will change to EGI/IRTF

# Incident Response

- EGI-CSIRT/IRTF monitors situation
- If necessary escalation to grid-sec
- If necessary remind NGI of their duties

# EGI-CSIRT

- TI-Listed (currently as EGEE OSCT)
- Is a virtual team, consisting of national Teams
- Duties rotate
- Operational since 1. May 2010
- Procedures will (hopefully) become better defined as EGI proceeds: Strong emphasis is put towards become a more “normal” CSIRT (as we see it).
