

idem C&C

idem Numbers

- www.idem.garr.it & refeds.terena.org/index.php/FederationIDEM
- 19 Members: 9 universities, 10 research institutions
 - 10^6 users
- 10 SPs: On-line journals, Library services, NREN support services (e.g. videoconference)
- GARR manages the IDEM AAI Service
- Shibboleth: 1.3 (deprecated) and 2.x

GENEVA Interoperability 1/2

- Previous tests by Oxford Computer Group in 2007:
<http://j.mp/1VdaFM>
 - ADFS in Windows Server 2003 R2 & Shibboleth 1.3f
- Our tests in June 2009
 - Participants: GARR IDEM AAI Service, University of Bologna, members of the IDEM Technical Committee, IdP managers, IBM
 - ADFS 2.0 "Geneva" Beta2 (plus patches from MS) & Shibboleth SP 2.1

GENEVA Interoperability 2/2

- Results
 - Geneva loads without problems the federation metadata file provided by Shibboleth.
 - Shibboleth SP **wasn't** able to read the federation metadata file provided by Geneva
 - After a manual configuration of the Geneva metadata configuration file, the communication is working.
- In September MS announced a delay in the official release of ADFS and MS asked to stop tests until the new release
- SAML2.0 interoperability matrix 2009Q3 (<http://j.mp/gIYVE>)
 - ADFS v2 passed IdP Lite, SP Lite and eGov-profile interoperability
 - preconditions of tests: **metadata exchanged and loaded.**
