

AAI @ Hungary

TF-EMC2 meeting, Prague

Kristof Bajnok

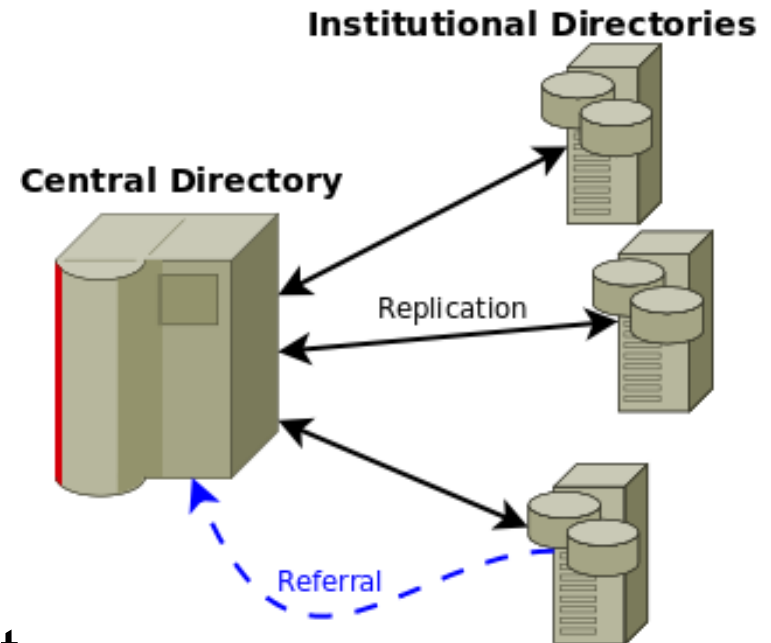

NIIF Institute

bajnokk@niif.hu

4 Sep 2007

Past...

- Monolithic directory service
 - 34 organisations were given LDAP servers
 - centralized replication
 - central OS + application management
 - distributed data management

More federated solution was needed

Present...

- Moving forward to deploy a Shibboleth-based federation
 - Technology
 - Most of internal applications of NIIF are shibbolized
 - Set up a Wiki
 - Interoperability testing
 - Starting with 5 universities

Goal: having a set of administrators with AAI knowledge

Plans...

- Policy, privacy, etc
 - Probably requires some software development because of Hungarian privacy regulations
- Get it into production
 - Monitoring and statistics based on AAIEye
 - Real federated applications
 - VoD, Vidconf booking on the way
 - commercial providers (ScienceDirect & co.)
 - Virtual IdP's for smaller institutions
 - Shib IdP with external user database

Staying (getting) international

- EduROAM
 - 8 institutions connected
 - at the moment...
- EduGAIN
 - Home Bridging Element deployed, works :)
 - Remote BE is coming
- Peer-to-peer federation connections
 - Fusion community (PAPI)
 - paused
