European University Information Systems

- Statutory association governed by French law
- Founded in 1993
- More than 70 members (IS associations and Higher Education institutions)

Objectives

- To encourage communication, collaboration and co-operation between those responsible for information systems in higher education and research institutions and organisations in Europe
- To liaise with the major suppliers in this field and represent the interests of higher education
- To liaise with organisations setting the strategic agenda for information systems in higher education and research at national and European level

Activities

Annual conference

Workshops & Seminars
