

Work Item:  
Integration with other operators

Stefan Winter <[stefan.winter@restena.lu](mailto:stefan.winter@restena.lu)>

# What is this about?

- Evaluate chances for eduroam-like roaming beyond WiFi
  - 3G Data Roaming
  - WiMax
  - White Space

# First steps

- 3G world: contacted an MVNE (Mobile virtual network enabler)
  - Entity which contracts with MNO (Mobile Network Operators) for roaming agreements
  - Sad result: data roaming not in focus, concentrate on voice and SMS
- Got in touch with 3G operator in Luxembourg
  - Can get own APN, but ...
  - No price advantage to their offer (just own IP space, own authentication)
  - Roaming prices as horrible as for any other

# The End

- Volunteers wanted!
