Main work items

- 1 Problem
- 2 Proposal
- 3 Discussion

Lost & disconnected

what if my eduroam is not working

Lost & disconnected

what if my eduroam is not working

A little story

Lost & disconnected

what if my eduroam is not working

A little story

- I'm in foreign land

Lost & disconnected

what if my eduroam is not working

A little story

- I'm in foreign land
- eduroam is not connecting

Lost & disconnected

what if my eduroam is not working

A little story

- I'm in foreign land
- eduroam is not connecting
- there is no open network

Lost & disconnected

what if my eduroam is not working

A little story

- I'm in foreign land
- eduroam is not connecting
- there is no open network
- I know no one

Lost & disconnected

what if my eduroam is not working

A little story

- I'm in foreign land
- eduroam is not connecting
- there is no open network
- I know no one
- I call home help desk

Lost & disconnected

what if my eduroam is not working

A little story

- I'm in foreign land
- eduroam is not connecting
- there is no open network
- I know no one
- I call home help desk
- My phone bill becomes fattier

- I call home help desk
- My phone bill becomes fattier

Sounds familiar?

A mail from a user

one of my user's recount of his suffering

A mail from a user

one of my user's recount of his suffering

A short summary of the user mail

A mail from a user

one of my user's recount of his suffering

A short summary of the user mail

- Conectivity problems

A mail from a user

one of my user's recount of his suffering

A short summary of the user mail

- Conectivity problems
 - In a few cases, authentication fails

A mail from a user

one of my user's recount of his suffering

A short summary of the user mail

- Connectivity problems
 - In a few cases, authentication fails
 - We use personal contacts

A mail from a user

one of my user's recount of his suffering

A short summary of the user mail

- Connectivity problems
 - In a few cases, authentication fails
 - We use personal contacts
- Support problems

A mail from a user

one of my user's recount of his suffering

A short summary of the user mail

- Connectivity problems
 - In a few cases, authentication fails
 - We use personal contacts
- Support problems
 - eduroam.es: nice site, complete, no help desk form

A mail from a user

one of my user's recount of his suffering

A short summary of the user mail

- **Conectivity problems**
 - In a few cases, authentication fails
 - We use personal contacts
- **Support problems**
 - eduroam.es: nice site, complete, no help desk form
 - eduroam.org: same situation

A mail from a user

one of my user's recount of his suffering

A short summary of the user mail

- Connectivity problems
 - In a few cases, authentication fails
 - We use personal contacts
- Support problems
 - eduroam.es: nice site, complete, no help desk form
 - eduroam.org: same situation
 - Local support: you need a local contact to create a ticket

A mail from a user

one of my user's recount of his suffering

A short summary of the user mail

- **Conectivity problems**
 - In a few cases, authentication fails
 - We use personal contacts
- **Support problems**
 - eduroam.es: nice site, complete, no help desk form
 - eduroam.org: same situation
 - Local support: you need a local contact to create a ticket
 - Remote support:
very dependent on institution/person responsiveness

Calling home

graceful degradation, is not a four letter work

Calling home

graceful degradation, is not a four letter work

Euroam *IS* a success

Calling home

graceful degradation, is not a four letter work

Euroam *IS* a success

- but sometimes it does not work

Calling home

graceful degradation, is not a four letter work

Eduroam *IS* a success

- but sometimes it does not work
- do we want it to die of success?

Calling home

graceful degradation, is not a four letter work

Eduroam *IS* a success

- but sometimes it does not work
- do we want it to die of success?
- why not make AAI enabled captive portals work for us?

Calling home

graceful degradation, is not a four letter work

Eduroam *IS* a success

- but sometimes it does not work
- do we want it to die of success?
- why not make AAI enabled captive portals work for us?
- if only to allow unlimited access to port 443

Calling home

graceful degradation, is not a four letter work

Eduroam *IS* a success

- but sometimes it does not work
- do we want it to die of success?
- why not make AAI enabled captive portals work for us?
- if only to allow unlimited access to port 443
- we have two (three?) working examples

Calling home

graceful degradation, is not a four letter work

Eduroam *IS* a success

- but sometimes it does not work
- do we want it to die of success?
- why not make AAI enabled captive portals work for us?
- if only to allow unlimited access to port 443
- we have two (three?) working examples
- we have been clever to create a success

Calling home

graceful degradation, is not a four letter work

Eduroam *IS* a success

- but sometimes it does not work
- do we want it to die of success?
- why not make AAI enabled captive portals work for us?
- if only to allow unlimited access to port 443
- we have two (three?) working examples
- we have been clever to create a success
- will we not be able to find a solution?

Time for discussion

my plane leaves at 15:25 :-)
