

Evolution of TF-NGN

Valentino Cavalli
TERENA

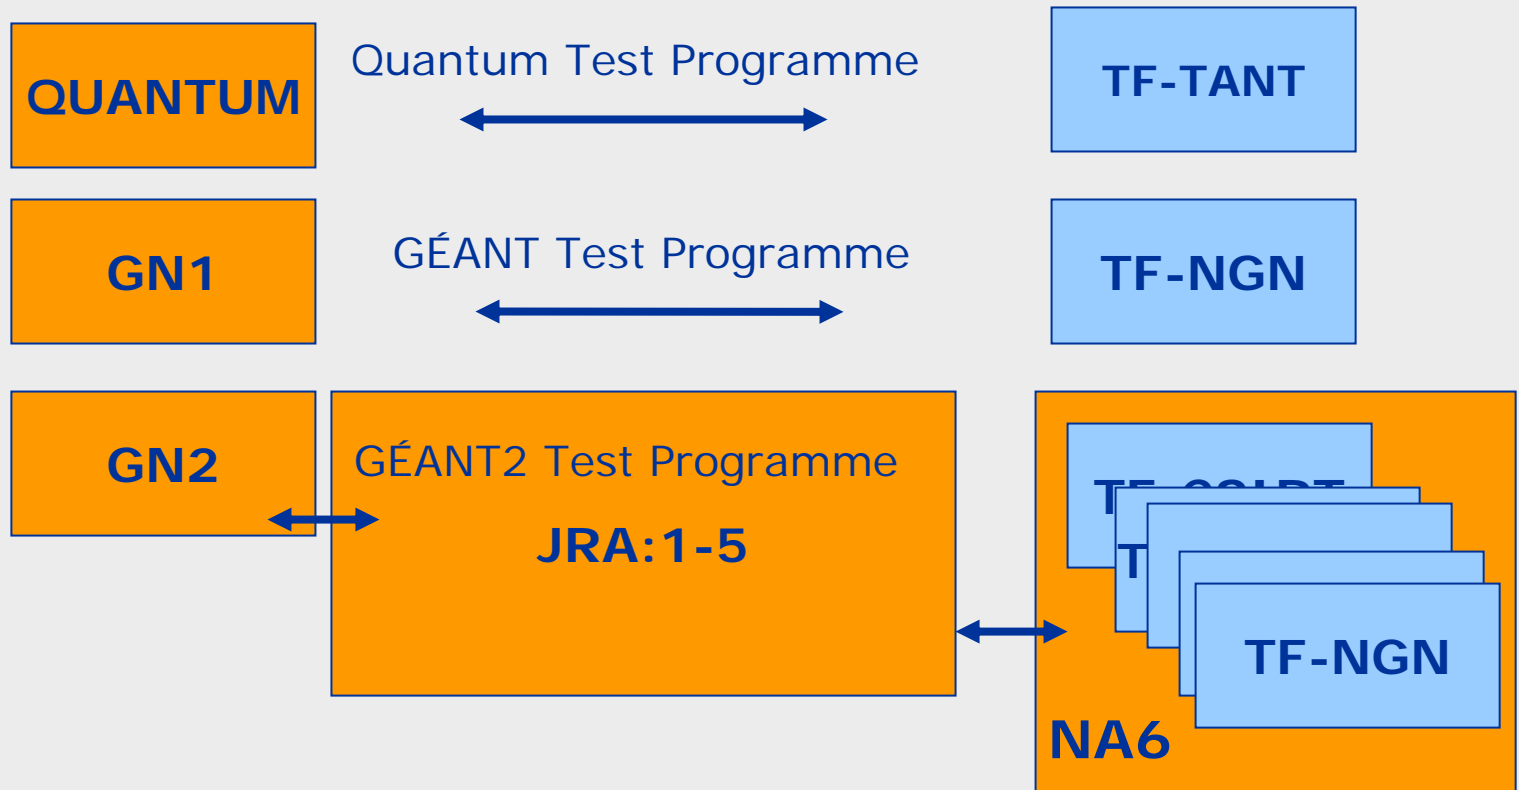

Issues

1. TF-NGN going to change role with GN2
2. Decreasing participation
 - TF-NGN not anymore very active in real collaboration
 - TF-NGN meeting becoming conference-like events
3. Goals of this discussion
 - Are there work areas that this group finds important and not covered?
 - Are there collaborative tests taking place elsewhere?

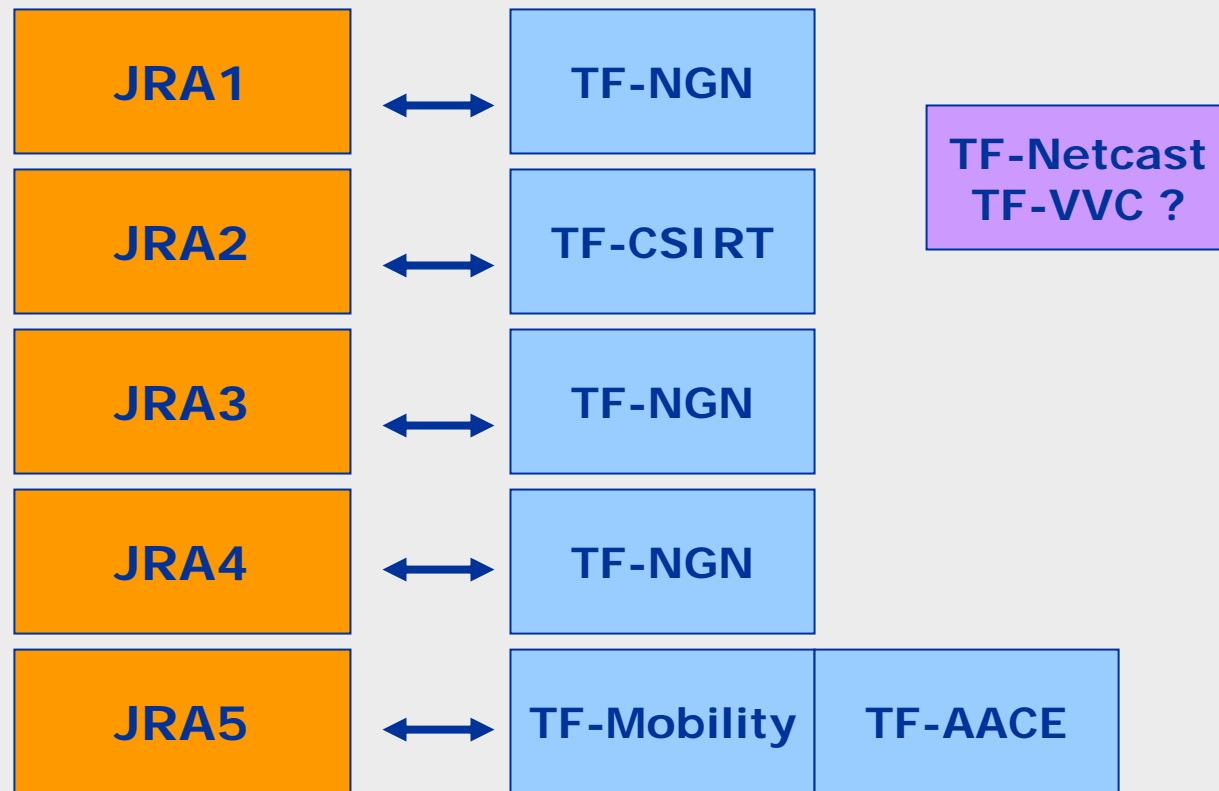

GN2-TF-NGN

A comparison with the tradition

JRA:1-5 – NA6

NA6 goals

- co-ordination and pooling of resources and technical knowledge among GN2 participants as well as with other groups that are active in technical development work that is directly relevant to research and education networking
- to provide forums where persons active in the GN2 project can discuss the progress and results of their work with experts from a wider European community and receive their feedback
- to provide forums to generate and discuss plans for new technical development work.

Current work items

As agreed in Budapest, October 2002

- Less-than-Best Efforts Premium IP Service Specification
- Improvement of current multicast service
- IPv6
- Tools for network monitoring and flow measurement
- MPLS testing
- Definition, Testing, Implementation and Monitoring of Differentiated IP Services
- Optical Networking
- New pilot services as defined in the GEANT Technical Roadmap
- AAA development
- Performance Enhancement Response Team (PERT) development
- GÉANT and NREN support for special projects
