

what did you like

what did you like less

what would you want to focus on

Task Force Goals

- to provide a forum for exchanging and promoting ideas, experience and knowledge.
- to identify, and promote the use of, common standards, techniques, (new) technology and procedures in the field of data storage that are relevant to the educational and research community.
- to be a focal point for (the gathering of) storage expertise within the European educational and research environment.
- to identify and coordinate and where possible collaborate on the development of storage services.
- work together with the NREN AAI federations (TF-EMC2/JRA5) to find possible solutions for AAI and non-web storage services.
- to liaise with other communities such as the grid environment, HPC, Internet2, APAN on storage activities.

tasks

- Knowledge dissemination
- Overview national activities
- File Exchange service
- **Collection of best practices and service requirements (legal, long term storage, security requirements)**
- **taxonomy of storage tech + storage middleware**
- Performance measurements
- Backup services
- Storage and AAI

evaluation Jun 2007-now

- **forum to meet storage people**
- **exchange ideas**
- **interesting presentations**
- FileSender
- Performance Measurements

Not that many collaborative projects

future

- interesting presentations
- forum for discussion, exchange of ideas
- filesender development
- collaborative projects?
- cloud?
- storage areas?
