The European Network and Information Security Agency (ENISA) is the EU's agency for cyber security.

**CHIHT - Clearing House for Incident Handling Tools**

This is a pilot site for a proposed collection of tools and guidelines of their use intended for incident handling teams. Information on this site reflects the experience of a number of European CSIRTs, working together as a project in the framework of the TERENA’s Task Force CSIRT.

**Disclaimer**

Inclusion of a particular piece of software does not imply any form of recommendation from ENISA, TERENA or the contributors. This is up to you to decide whether a particular program is suitable for your purposes.

Also note that an unauthorised use of some of these tools may constitute criminal offence. Please read the warning before proceeding.

**Clearinghouse Organisation**

The first group of tools relates directly to the investigation of incidents. Tools are grouped by functions representing the normal sequence of an investigation.

- Gathering evidence from the scene of an incident
  - Examining media
  - Examining system
  - Investigating evidence of an incident

**Examining media**

The Corner's Toolkit (TCT)

TCT is a collection of programs by Weibe Verena and Dan Farmer that can be used for a post-mortem analysis of a Unix system after a break-in. The website includes handouts from a tutorial session, as well as examples of use of the tools in practical situations.

**Encase**

Encase is a commercial evidence gathering and analysis tool, which performs all stages from imaging disks through investigation to preparing a final report. Once a disk has been imaged, Encase can be used to search the image, including deleted files and freespaces, using built-in search tools or a macro language. Encase is commonly run on a dedicated forensic workstation. Typical configurations are: laptop PC with 500GB of hard disk, 006-4 tape drive and CD Writer Laptop PC with 20GB of hard disk for work outside office. The website includes examples of the use of the package.

**New survey planned ... soon™!**
