Questionnaire

Best practice guide on alerts, warnings and announcements

It was prepared by Don Stikvoort, working in a project team with Tomasz Chlebowski, Klaus-Peter Kossakowski, Mirosław Maj, Roeland Reijers, Przemysław Skowron and the project officer is Cosmin Ciobanu.

This project has the primary objective to create as end report a best practice guide on Alerts, Warnings and Announcements as part of the ENISA P/17/12/TCD LOT 2. To reach this result, the different methodologies in that area will be surveyed, and also made available as an inventory. Additionally, and part of the end report will be how to overcome the common shortcomings identified during the stock-taking and analysis, including tasks and roles of different stakeholders.

The survey will be used in this framework. Additionally and in parallel we seek to talk one-to-one with those among you who wish to further contribute to the intent and the reviewing.

Thank you for any contribution you can make! Of course your contribution will be treated confidentially.

On behalf of the project team
